

Xcluder® Automatic Door Bottom

Rodent Proof, Auto-retracting Door Bottom Seals

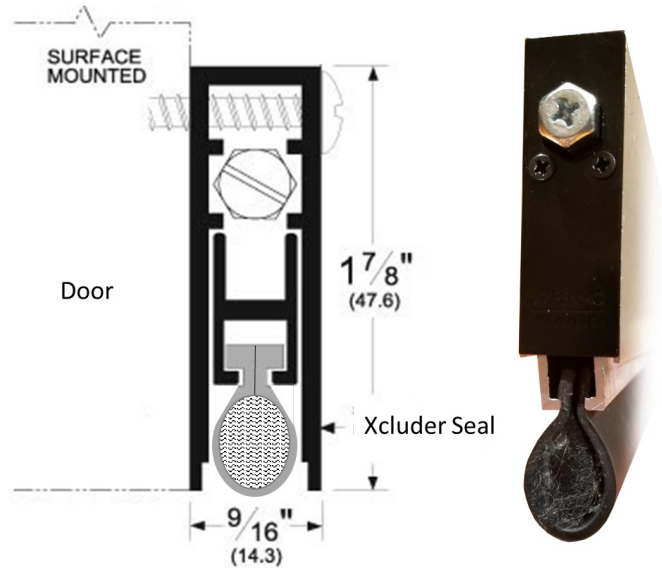

Ideal for uneven surfaces, the Xcluder Automatic Door Bottom (ADB) features an aluminum case surrounding a movable drop-bar seal. The drop-bar seal is actuated by a plunger which contacts the jamb as the door is closing, forcing the drop-bar seal down against the floor / threshold creating a secure seal.

The rubber seal is filled with our patented Xcluder fill fabric to provide dependable protection against rodents and the elements.

Key Features:

- Surface mount to either wood or hollow metal doors
- Non-handed reversible design. Simply flip the ADB for left or right hand actuation
- Available in 36" (91.44 cm) and 48" (121.9 cm) lengths
- Xcluder ADBs can be trimmed down by up to 2" (5 cm)
- End plates included
- The drop-bar seal actuation mechanism causes the drop-bar seal to always actuate on the hinge side first. This feature prevents the seal from skidding along the floor / threshold while the door is being closed. Door hang up will not occur.
- Seals gaps up to .75" (20 mm)

Options and Sizing

Item	Description	Length	Color
162525-36	Xcluder Automatic Door Bottom	36" (91.44 cm)	Aluminum
162525-48	Xcluder Automatic Door Bottom	48" (121.9 cm)	Aluminum
