XCLUDER®
RODENT AND PEST DEFENSE

Multi-layer protection with new STAINLESS STEEL SCREEN

- Protective Backing
- Xcluder Fill Fabric
- Stainless Steel Screen
- Rubber Seal

Xcluder® X2 Garage Door Bottom Seal Kits
Rodent Proof Door Bottom Seals
for Commercial and Residential Applications

Our unique X2 retainer allows the combination of the Xcluder Rodent Proof Door seals and a durable brush seal to provide your home or business with the ultimate protection.

The Xcluder Rodent Proof Door Seal features an outer layer of heavy-duty rubber, a layer of stainless steel screen, and an inner core of our patented Xcluder fill fabric to provide dependable protection against rodents and the elements. The brush seal faces the inside of the door and conforms to textured or uneven surfaces eliminating tiny gaps and blocking light and insects.
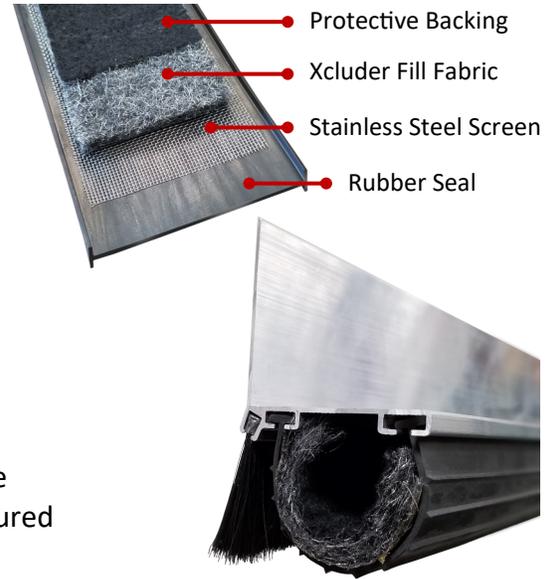

Everything is included

Our kits include everything you need to replace the old seal on your garage with the Xcluder rodent proof garage door seal.

The kits come in 3 common lengths, and retainers can be trimmed to length and notched around door hardware for an exact fit on just about any door.
